52 Convertible

You're serious about your fishing, so rightfully you demand two absolutes from your boat. A cockpit that doesn't cramp your style. And accommodations that let you concentrate on comfort.

This, in simple terms, is your Hatteras 52 Convertible.

If it's possible for a cockpit to be oversized, ours qualifies: 153 square feet give you the room you want, whether you're swinging a fighting chair or reliving the big fight later, over refreshments.

There's no shortage of working or storage room, either, thanks to the all-new, molded-in bait and tackle consoles on the forward bulkhead. Within those tough, handsome consoles you'll find a wet sink,

a built-in bait station, a tackle compartment, and generous storage areas. Your gear, tackle, bait, and even clutch and throttle controls can be tucked away neatly, yet are immediately accessible.

Just to show you how truly remarkable this 52 Convertible is, the starboard console gives you a Hatteras feature no other boat of this size can offer: stand-up access to the engine room through the cockpit.

The engine room itself is remarkable for this class and size of convertible. It's been especially designed for ease of movement. Machinery is unusually accessible, and there's plenty of overhead space.

(A related demonstration of Hatteras ingenuity is that the air for the engine room comes from intakes under the cockpit coaming, instead of from hullside air in-

take vents. The result of this is drier engine room air. Hatteras engineers take nothing lightly.)

The standard 30-inch-wide transom gate was built for landing your quarry easily, plus comfortable boarding from a dinghy or at the dock.

The 52's huge flying bridge gives good visibility around the entire boat, and excellent visibility into the cockpit—an important benefit during the maneuvering for a big fish. The flying bridge is, of course, equipped with full instrumentation, seating for your guests, and a welded stainless steel ladder that makes movement to or from the bridge easy.

With all these fighting features, you know the Hatteras 52 is one fishing machine that takes your fun seriously. Without forgetting for a minute what it means to be a Hatteras.

**FOR PEOPLE WHO
THINK FISHING IS MORE
THAN JUST FUN AND
GAMES.**

The only thing we take as seriously as your fishing is your comfort.

No one aboard spends all their time fishing. So it's rewarding to know that your non-fishing hours will also be spent in true Hatteras fashion.

A Hatteras 52 Convertible has many of the features and the interior roominess of a boat considerably larger.

(Part of the roominess comes from the way she is designed for stability and mobility in the open water. Her famous Hatteras Hargrave hull is double-chined, to deflect spray down and away. The double-chine also allows for increased beam without increasing the wetted surface.)

In keeping with the flexibility of customizing this convertible to your particular requirements, the interior can be chosen in a galley-below arrangement, or in an optional deckhouse galley arrangement that gives you three staterooms.

In either of the arrangements, the Hatteras tradition of fine cabinetmaking, and efficient use of salon space is evident throughout.

Which should come as no surprise.

The standard floor plan features a galley-below which opens widely to the large salon above. There are also two staterooms, each with its own head.

The well-lit galley in the below-deck arrangement offers you an efficient, step-saving configuration, a refrigerator with a freezer and ice-maker, a three-burner range with oven, a stainless steel sink, and generous storage and counter space.

A salon wet bar (in the lower-galley arrangement) sits below the aft bulkhead window. The bar includes an ice-maker, stainless-steel sink, several storage areas, and a recessed serving top.

The Hatteras 52 Convertible

The deckhouse galley arrangement includes a convenient dinette that seats four and offers storage space under the seats.

The optional deckhouse galley puts at your convenience a microwave/convection oven, a Jenn-Air® range, a large refrigerator/freezer with ice-maker, and room for an optional compact under-the-counter dishwasher. A spacious built-in lounge is also available.

Privacy for your entire fishing party.

No matter how closely knit the members of your fishing party are, there comes a time when each will want to retire to privacy.

When that time comes, the Hatteras 52 Convertible remains the ever-gracious hostess. It gives each the seclusion and accommodations they'd expect from a boat bearing the Hatteras name.

The stateroom accommodations have been given the same attention to efficient use of space that is apparent in the salon area.

Each stateroom has private access to a head. Each stateroom has separate thermostat controls for heating and air conditioning. And each stateroom has the appointments and fine woodwork worthy of a Hatteras. And of her guests.

When you consider the spacious possibilities of three staterooms, the huge flying bridge not usually found on a boat this size, and the excellent engine-room accessibility not usually found in a boat this size, the Hatteras 52 Convertible is well capable of giving you the most boat for your money.

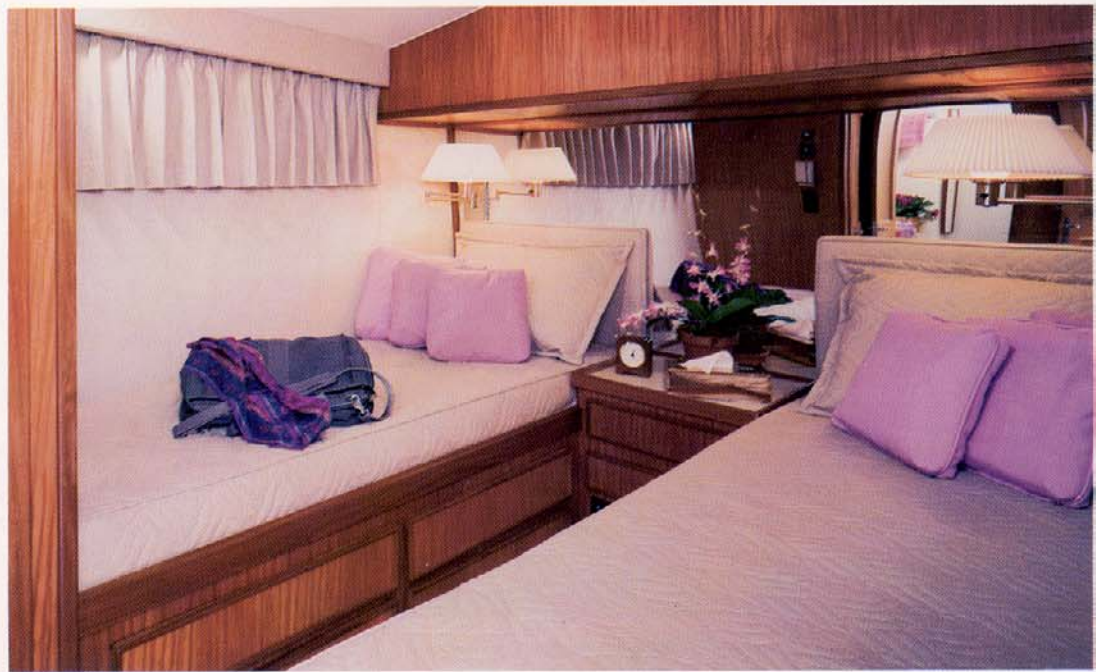

Your Hatteras dealer can present you with even more reasons to consider a boat no bigger, or less luxurious, than this one.

Shown at right: master stateroom with optional queen-size berth.

The master stateroom (below) contains side-by-side twin berths, plus standard built-in storage cabinets, hanging locker, and private access to a master head with stall shower.

The master stateroom head is a study in accessible privacy, with tasteful appointments, a ventilating portlight, spacious cabinets, and a stall shower.
