

The new 28 foot fiberglass Hatteras Sport Fisherman

The new 28 foot twin-engine fiberglass **Hatteras**

This view of the cockpit shows its roominess with space for a fighting chair and two fishing chairs; as well as the engine boxes which can serve as seats or tables. Likewise, it shows how accessible the engines are for servicing. Note the low contour of the cockpit that also facilitates boarding fish.

The Hatteras-designed control console has a leather-grain Parkwood panel with Morse Controls, complete dual instruments and switches, including fuel gauge. The 4 in. "Corsair" or the 5 in. "Constellation" compass is optional. ▶

Sport Fisherman

Now it is possible to have Hatteras big boat quality in a smaller boat. This 28 foot Sport Fisherman is made to the same standards of design, styling, materials, engineering and construction as the larger Hatteras yachts.

This 28 footer has typical Hatteras comfort,

Hatteras roominess, Hatteras safety and Hatteras low maintenance.

Like all fiberglass Hatteras yachts, it has more usable interior space than most boats made of wood.

The Hatteras is so much easier

The head has 6 ft. 2 in. headroom. Light fixtures, storage lockers galore (5½ cu. ft. of space). Contour-molded countertop and sink. Pressure water system. Large mirror. Medicine cabinet. Two 110-volt outlets. Vinyl floor. (All standard.) ▶

seaworthiness,
 chts, you get
 similar sized
 r to maintain

because of its one-piece fiberglass hull and fiberglass super-structure. No seams, no joints, no loose fastenings. Rust, dry rot, caulking and sanding are eliminated. Paint for appearance, if you want to, but you don't have to paint for protection.

With its 12 ft. 5 in. beam, the interior of the Hatteras 28 footer is larger and has more usable space than any other boat in the same range. Headroom here is 6 ft. 2 in. Windshield and screened side windows of trunk cabin provide 22½ square feet of window space for exceptional light and viewing.

Dividing the living area from the bow stateroom are two hanging lockers, each with 9¼ cu. ft. of space. The bow stateroom has two 6 ft. 3½ in. berths with polyfoam mattresses. There are 6 drawers beneath the berths with 5½ cu. ft. of storage space. The rope locker has 13½ cu. ft. of space. Two 110-volt outlets.

The efficient design has the dinette a step away from the galley—very convenient.

The dinette seats four, converts to a double bed to sleep two. Curtains are standard. There's a full hanging locker aft of the dinette, as well as drawers underneath the seats. Storage cabinet in sidewall. 110-volt duplex outlet; and 12-volt light fixtures are standard.

Efficient, roomy galley. Large enough to work, with walk-by room. A 3 cu. ft. locker. Stainless steel sink with pressure water system. 4 cu. ft. ice box and 2-burner alcohol stove are standard. Headroom 6 ft. 2 in. 110-volt outlets for appliances. Optionally available are hot water, electric refrigerator, and electric stove. ▶

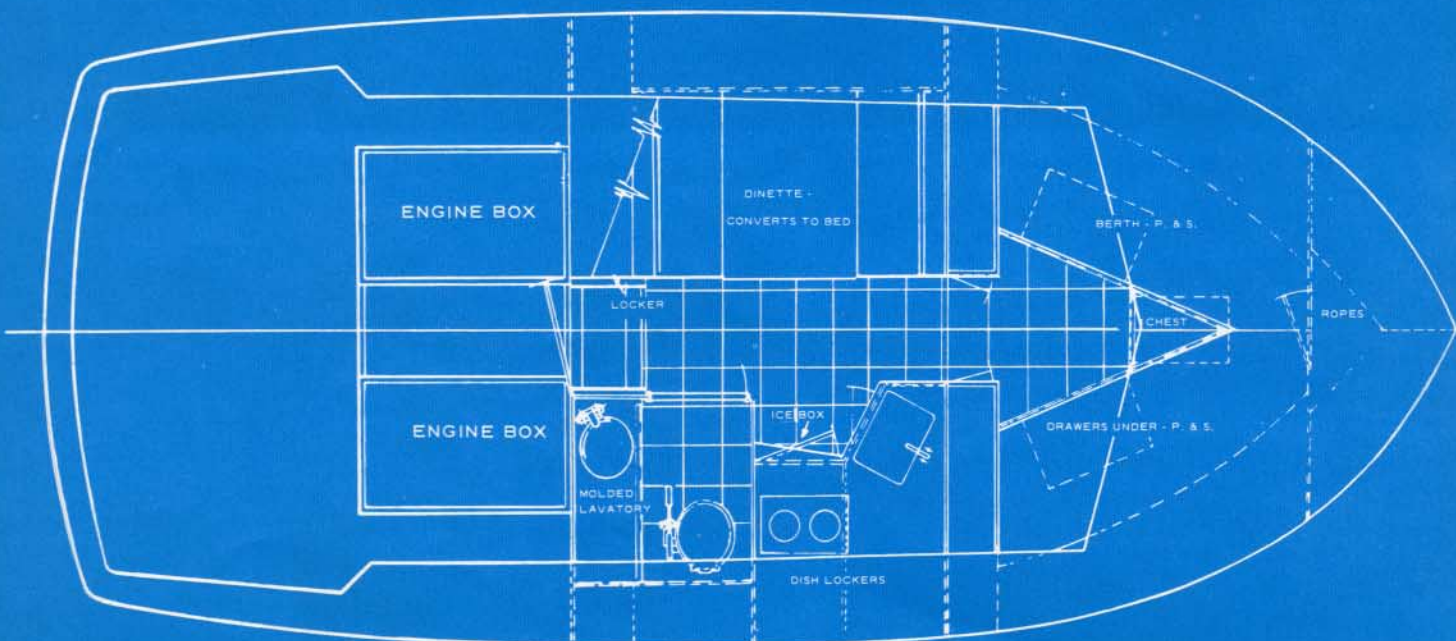

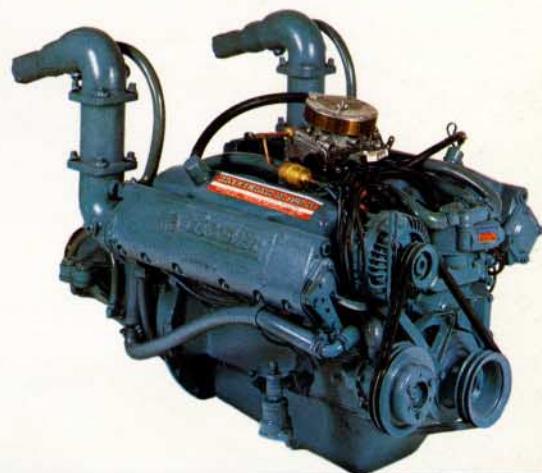

This Hatteras 28 will move along — (over 40 m.p.h. with 290 HP engines, under normal conditions). It is unusually easy to handle and maneuver. Fiberglass reinforced plastic is the strongest material for marine construction. It permits a more efficient hull shape. It virtually eliminates pounding, yawing and broaching. Even at high speeds, it throws water off in a low flat arc.

Note that a skilled water skier can enjoy riding behind this 28 footer when run at average speed. Expert skiers could have a ball with 28 footer opened up some.

Twin 290 HP gasoline engines enable you to go out where the big ones are so you can enjoy real deep sea sport fishing.
