Hatteras

**37 Convertible**

**If you're big on fishing.**

# ...or big on family and friends.

Take your family and friends for some fun on the water. Take them out on your Hatteras 37 Convertible.

Since she's broad and stable, they'll feel comfortable.

Since she's a Hatteras, you will too.

The flybridge has forward and side lounges (and ample space) for seating six comfortably. Plus a sturdy stainless steel hand-rail so your guests may move about confidently. When underway, the flybridge is where you'll all want to be.

When anchored, there's a wide foredeck for sunning. And the cockpit has a transom gate for the swimmers. To aid passage from cockpit to foredeck, the 37 has wide side decks with a non-skid surface and a solid set of stainless steel handrails.

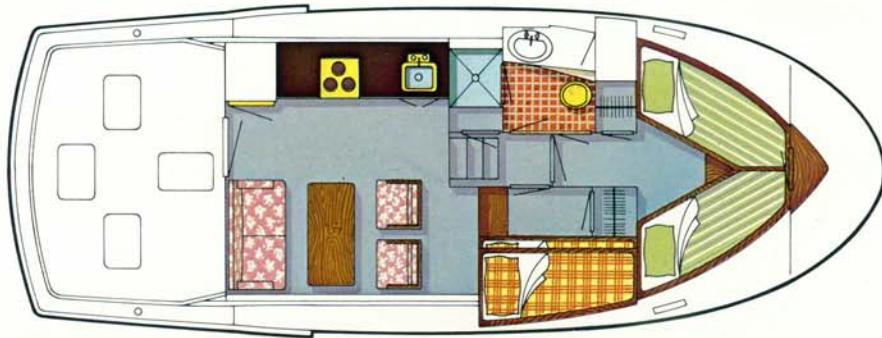

The interior of our 37 is equally hospitable. You'll find exquisite panelling and cabinetry throughout. It's rare wood. Rich in color. Hand-fitted. Hand-finished. It's beauty is timeless.

Forward, there are two private staterooms. Each stateroom has two long, wide berths. And good drawer space, a hanging locker of closet proportions, full-length framed mirror. Plus deep, plush carpeting.

While conveniently located near the salon, the head can serve the two staterooms in privacy. Stall shower with door. Large medicine cabinet with mirror. Electric toilet. Hot and cold water. Vitreous china wash-basin. Abundant storage for linens. Vinyl

headliner, floor and wall covering well suited to the bathroom environment.

The salon is a natural gathering spot. Port side, you have a full galley: range with oven, AC/DC refrigerator with freezer, stainless steel sink, good drawer and storage space, even a damp chaser.

The remaining area will accommodate the furnishings of your choosing.

The salon also features large sliding windows of tinted safety glass. Interior carpeting

and draperies are available in a number of materials in various colors and textures.

All things considered, transforming "our" Hatteras into "yours" should be a simple and pleasant experience.

Now, while our 37 Convertible will host a crowd, she doesn't need a crew to run her.

With the skipper in mind, we located the 12 volt and 120 volt electrical panels together: The Hatteras Master electrical panels are handy ... and easier to understand and operate.

With the skipper in mind, we designed the engine room for easy accessibility to vital components.

We laminated a SSB radio ground screen in the hardtop.

We gave our 37 an automatic battery charger, a rugged generator, heavy duty alternators, battery paralleling system, transformer connected shorelines, ground fault interruption on A.C. receptacle circuits, fiberglass fuel tanks, automatic Co<sub>2</sub> system and more.

Much more. And it's all accounted for in a long list of

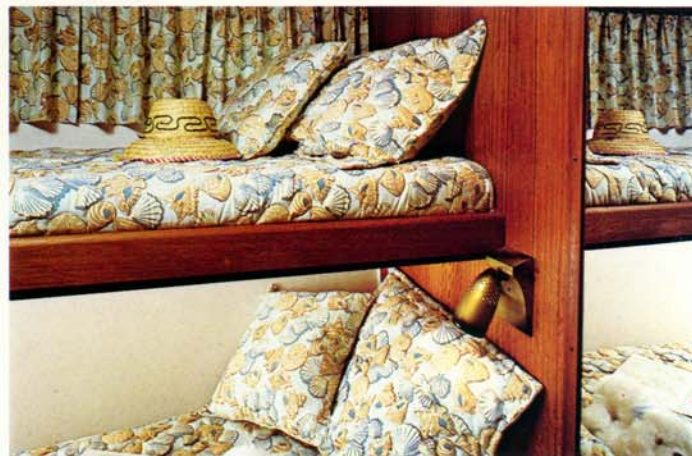

standard equipment you can obtain from your Hatteras dealer.

Why all the care...and thought...and equipment? Because we at Hatteras are big on a number of things too. Things experienced yachtsmen demand. Seaworthiness. Craftsmanship. Resale value. Pride.

Your Hatteras dealer will be pleased to tell you more about the 37 Convertible and us.

See him soon.

We think you'll find yourself becoming as big on Hatteras as he is.

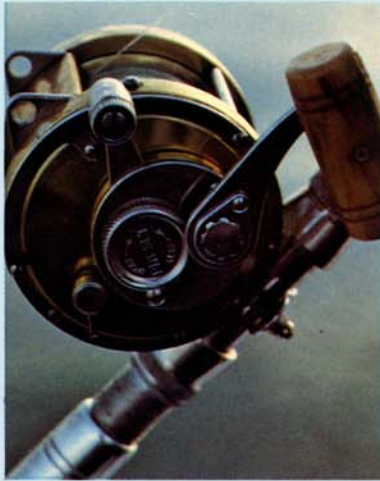

Get into our Hatteras 37 Convertible.

Our 14 feet of beam Hatteras 37 Convertible.

She'll be as much a source of pride and satisfaction for you as any marlin or wahoo you might catch.

She is unquestionably a Hatteras. Solid. Seaworthy. A great sea boat with outstanding performance and handling capabilities.

Her hull, like every Hatteras we build, is one-piece molded fiberglass. So she can take pressures and stresses of the sea. And her hull, like the rest of the boat, is double protected—first, by gel coat; then a tough polyurethane skin. The resulting finish lasts for years and makes maintenance easy.

Our 37 Convertible is also unquestionably suited for fishing.

Her hull is a modified vee for stability. And it's double chined so wetted surface is reduced. Deep keeled to protect underwater gear in the shallows and help keep you on track underway.

The advantages to you and all aboard are: greater comfort while running, trolling or at the dock; greater interior accommodation space.

The standard flybridge of our 37 has plenty of room. Room for a fully instrumented control console. Room for the normal complement of electronics which we know you'll be adding. Room for storage (two large doors in the forward section of the bridge open to a cavernous area, and there's storage below the control console).

Helm placement provides excellent visibility aft into the cockpit and forward for running and close maneuvering.

The beaminess of our 37 also results in a roomy cockpit. No-one has to fight to move around the fighting chair. And no-one has to fight for footing since the fiberglass cockpit sole has a non-skid surface.

Other features of the cockpit include: Fully scuppered access hatches and conveniently located shoreline inlets. Available options include: a cockpit control station and convenient bait and tackle center.

Another feature that's typical of the care and thought that go into a Hatteras: a large fiberglass transom gate. The convenience of it will be evident the first time you slide aboard a giant fish. The solidness of it, you'll enjoy every time you open and close it.

That's just one of the details, large and small, that we've attended to.
